PINS FOR TEXTILE MACHINES

Pins are our basic products, and we have definite expertise in this field. From very fine pins for the cotton combing to pins used in Stenter Machines to thick pins used for ropes, we have it all with us. A rigorous check during the manufacturing process by our technical experts & selection of quality raw materials enables us to achieve high quality and adhere to customer specifications.

The following are Key Features of our pins :

1. Precise Dimensions
2. Uniform & Correct heat treatment according to the end use of pins.
3. Fine Polish
4. Correct Taper for Fiber guidance and longevity.
5. Our thorough understanding of each textile process where the pins are used enables us to deliver just the right product for the job.
